

NIMATIC NRC-200 – Reversible vacuum cleaner

NRC-200 is compressed-air driven comfortable, fast and compact vacuum pump system that was designed to displace large quantities of liquid in the most efficient way.

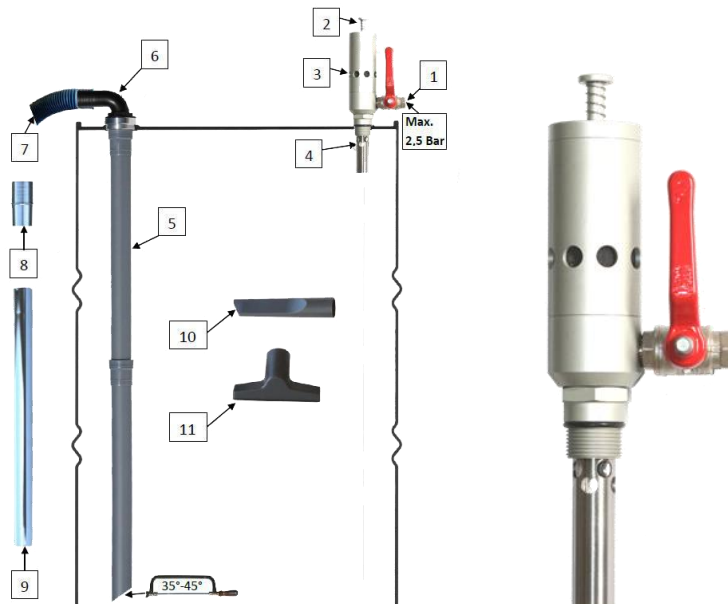

The system works by creating a vacuum in a standard 200L or 55L steel drum. The pump can also be switched to create a pressure inside the steel drum and pump the liquid out if necessary. The whole process takes merely some minutes in total and - most importantly – without making a mess!

See the DEMO video:

KIT contents:

1. Reversible vacuum pump
2. Overflow protection switch
3. Suction hose 1,5m
4. Adapters for steel drums
5. Extension for suction hose
6. Various nozzles
7. Brackets

Max working pressure - 2,5 Bar
Recommended working pressure - 2 Bar
