

**PROMOTIONS**

**TURNING**

All promotions refer to the First Choice program only! Valid from: September 1 – December 31, 2021

**Grooving and Cut-Off**

**Beyond™ Evolution™**

1 Beyond™ Evolution™ → Buy 20 Inserts\* – Get the holder free of charge!

**A4™**

2 A4™ → Buy 20 Inserts\* – Get the holder free of charge!

**LT Threading**

3 LT Threading → Buy 20 Inserts\* – Get the holder free of charge!

\*Geometry combinations possible at a minimum order of 10 inserts per geometry.

# SPECIAL DEAL

Promotion valid from Sept. 1 – Dec. 31, 2021

## KCS10B™

Latest PVD turning grade for medium cutting and finishing applications

**BUY 40,  
GET 50!**  
DETAILS BELOW

Most common ISO types!

### Materials

### Applications

- Insert geometries can be combined.
- Minimum order per geometry: 10 pieces.
- Get 10 more of the least-expensive inserts for free.

Top Notch™ Profiling enables precise copy turning!

The new KCS10B turning grade features High-Power Impulse Magnetron Sputtering (High-PIMS) coating technology. High-PIMS is characterized by:

- Smooth coating surface.
- Optimum layer adhesion, especially on sharp cutting edges.
- High depth-of-cut notching resistance.
- Long tool life and high process reliability.

Applied on an extremely hard and wear-resistant, ultra fine-grain carbide substrate, the KCS10B grade is ideal for medium machining and finishing operations of high-temp alloys, stainless steel, and alternatives to steel.

The Top Notch Profiling system provides consistent tool life and performance, accurate indexing, and superior clamping in precise machining and copy turning.
